RE: ABOUT SUMMIT BIKE CLUB

As USA Cycling's mountain bike club of the year for the last two years, Summit Bike Club helps develop local athletes, and educate them about skills, safety, and sportsmanship of cycling. These local members contribute back to the cycling community, by volunteering with trail building/maintenance and coaching their younger peers. Along with our high involvement of junior cycling at the local level, Summit Bike Club has a high level of visibility on a national stage. We travel the country with one of the largest in the country. Summit Bike Club although based in Park City, also has programs and athletes based in Texas and Colorado.

Our juniors programs start with athletes as young as nine years old in our local U12 programs and up to 24 years old in our oldest programs. We create steps for kids to be introduced into the sport and then continue to improve their skills and fitness in fitting ways for their ages.

Some athletes travel the county, and the globe, giving these local athletes the opportunity to see new places and achieve their ultimate cycling goals. Even though athletes travel because of biking, they learn much more that also applies off the bike while experiencing other cultures from around the world. In 2017 athletes will travel to Canada and Austria followed by UC National Championships in West Virginia and athletes potentially qualifying to compete for the United States at World Championships.

Along with our athlete development programs, our organization is hosts two mountain bike events in May. Both are in Wasatch County but right near the amazing riding we have here in Summit County. Over Mother's Day weekend we are holding a National level PRO XCT event at Soldier Hollow followed by our annual 6 hour race, the Wasatch 360 on memorial day, which is held on the Riverview trails in Heber City.

Visit www.summitbikeclub.org for more info on the organization and our various programs.

Visit www.growmtb.com for more info on our events and collaborative efforts with other junior programs.

Sincerely yours,

Michael John E. Turner
